

SANDUN DIMANTHA

Full Stack Developer · IT Undergraduate

Colombo, Sri Lanka | +94 70 4415 497 | sandundimantha2002@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Versatile Full Stack Developer and 3rd-year BSc (Hons) IT student at SLIIT with demonstrated experience building production-ready MERN stack applications, Android apps, and automated management systems. Delivered end-to-end projects spanning e-commerce, health tech, parking management, and travel platforms. Actively expanding expertise in AI/ML and Cloud Computing to engineer high-performance, scalable solutions.

EDUCATION

BSc (Hons) in Information Technology Sri Lanka Institute of Information Technology (SLIIT)	2024 – Present
G.C.E. Advanced Level Pinnawala Central College ICT (C) · Engineering Technology (C) · Science for Technology (B)	2019 – 2022
G.C.E. Ordinary Level Km/V Dombemada Kanishta Vidyalaya	2007 – 2018

CERTIFICATIONS

• AI/ML Engineer – Stage 1 & Stage 2 — SLIIT	Jan 2026
• Google Cloud Digital Leader Training — Google Cloud	Feb 2026
• Digital Transformation with Google Cloud — Google Cloud	Feb 2026
• Security Principles in Cloud Computing — Google Cloud (Coursera)	Feb 2026
• Python for Beginners — University of Moratuwa (CODL)	Nov 2025
• Project Scope & Schedule Management — University of Moratuwa (CODL)	
• Foundations of Project Management — University of Moratuwa (CODL)	

KEY PROJECTS & ACHIEVEMENTS

Tourism Management System (SerendibGo) MERN Stack · JavaScript · HTML · CSS · Stripe API · Nodemailer · REST APIs · JWT · Git	July 2025 – Oct 2025
---	----------------------

- Developed a full-stack tourism platform for booking tours, hotels, guides, and vehicles with real-time availability, secure JWT authentication, and Stripe payment integration.
- Applied Agile methodology and integrated third-party APIs for maps and notifications in a fully responsive web application.

Live Demo: <https://serendib-go-travel.vercel.app>

MERN Food Ordering System

React · Node.js · Express · MongoDB

- Built a full-stack web application enabling customers to browse menus, manage carts, and track orders in real time with a fully responsive UI.
- Implemented RESTful APIs with Express and Node.js; designed MongoDB schemas optimised for real-time data retrieval.

Park Pal Swift – Parking Management System

HTML · CSS · JavaScript

- Engineered a frontend parking platform enabling users to check slot availability, book parking spaces, and access an admin dashboard.

Online Examination System

Kotlin · XML · Android

- Developed an Android application that delivers timed MCQ examinations with instant automated evaluation and score reporting.

WellnessApp – Mobile Health Tracker

Kotlin · Android

- Built a mobile application for tracking personal wellness metrics and goal progress, focusing on intuitive UX for daily health monitoring.

Online Computer Spare Parts Store

E-Commerce

- Designed and built an e-commerce platform for managing inventory and sales of computer hardware components.

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, Python, PHP, Kotlin, C
- **Frameworks:** React, Node.js, Express, Next.js, Spring Boot, Material UI
- **Web:** HTML5, CSS3, Tailwind CSS, JSX, TSX
- **Databases:** MongoDB, MySQL, PostgreSQL
- **Tools:** VS Code, IntelliJ IDEA, Android Studio, Postman, CursorAI
- **Version Control:** Git, GitHub
- **Cloud & AI:** Google Cloud Platform, AI/ML Fundamentals
- **APIs & Auth:** REST APIs, JWT, Stripe API, Nodemailer

SOFT SKILLS

Team Collaboration · Problem Solving · Leadership · Analytical Thinking · Communication · Time Management · Agile / Scrum · Adaptability

EXTRA-CURRICULAR ACTIVITIES

Project Management: Defining project scope, managing deliverables, and controlling timelines across academic and personal projects.

Leadership: Led technical decision-making across multi-contributor team projects with strong analytical and debugging skills.

Athletics: Competitive cricket and volleyball player; developed discipline and teamwork through inter-school competitions.
